

Ozodjon A'zamjonov || Backend Developer || Tashkent, Uzbekistan || gophers.uz
Email: ozodjon160605@gmail.com || **Telegram:** @ozodjons05 || **Phone:** +998934628018

Work Experience:

SmartAdmin.uz – CRM Admin Panel | Oct 2024 – Apr 2025

- Developed and maintained a CRM system for managing product inventory, sales, cash flow, debts, and purchases.
- Implemented scalable backend services using Go, PostgreSQL, Redis, and Docker.
- Led backend architecture for multi-company and multi-branch support.

Udevs – MBF SAP Mobile App | Dec 2025 – Apr 2025

- Contributed to a mobile ERP solution integrated with SAP Business One.
- Developed logical and performance-critical APIs using Go, gRPC, and REST.
- Optimized concurrent processes with Goroutines, improved performance, and scalability.
- Worked in a cross-functional team (DevOps, Flutter, Frontend), using Redis, RabbitMQ, Knative, and Docker.

BabylonDev | Jul 2024 – Sep 2024

- Focused on secure and scalable backend architecture.

Technical Skills:

- **Languages:** Go, Python, C
- **Frameworks:** Gin
- **Microservices & Communication:** gRPC, Protocol Buffers
- **Databases:** MongoDB, PostgreSQL, Redis, MySQL
- **Tools & Technologies:** Docker, Docker Compose, Swagger, JWT, Casbin
- **Message Brokers:** Kafka, RabbitMQ

Projects

1. Monitoring Alert System

- **Description:** Developed a monitoring system to continuously check and analyze server loads. It detects issues like overheating and abnormal load increases and automatically sends alerts via a Telegram bot, specifying the device and issue for prompt resolution.
- **GitHub:** <https://github.com/BEKJONS/MonitoringAlertSystem>

2. ManageApp.uz - Social Media & Task Management System

- **Description:** Built a platform for scheduling social media posts and managing team tasks similar to Jira. Features include post scheduling, team task assignment, and progress tracking.
- **Web :** manageapp.uz

3. SmartAdmin CRM

- **Description:** Developed a CRM admin platform to manage company operations like product inventory, income tracking, and expense management. The system simplifies handling financial data and ensures efficient company resource management.
- **Web:** smartadmin.uz

Education

Najot Ta'lim – Backend Development (Go, Python, C)

International House – Economics

State University of Economics – Economics (Bank)
