Work Experience:

BabylonDev | Jul 2024 – Sep 2024
- Worked on secure and scalable backend architecture.

SmartAdmin.uz – CRM Admin Panel | Oct 2024 – Apr 2025
- Developed a CRM system for inventory, sales, finance, and debt management.
- Built scalable backend services using Go, PostgreSQL, Redis, and Docker.
- Designed multi-company and multi-branch backend architecture.

Udevs – MBF SAP Mobile App | Dec 2024 – Jun 2025
- Developed performance-critical APIs integrated with SAP Business One using Go, gRPC, and REST.
- Optimized concurrent processes with Goroutines to improve system performance.
- Collaborated with DevOps and mobile teams using Redis, RabbitMQ, Knative, and Docker.

Noor - PharmaCosmos | *June 2025 – Oct 2025*
- *Enhanced internal CRM by implementing new features and Redis-based performance optimizations.*
- Developed and optimized REST APIs with advanced SQL query tuning for high-load scenarios.

ItLegacy - Findest | *Oct 2025 – Present*
- *Developed a multi-tenant Retail/CRM system covering inventory, POS, finance, cashbox, loyalty, and customers.*
- Implemented scalable backend services with Go, PostgreSQL, Redis, Docker, and Swagger-documented APIs.
- Designed backend architecture supporting multi-company, multi-branch, RBAC, and service-based modules.

Technical Skills:

- **Languages**: Go, Pyhton, C
- **Frameworks**: Gin, Fiber
- **Microservices & Communication**: gRPC, Protocol Buffers
- **Databases**: MongoDB, PostgreSQL, Redis, MySql, CockroachDB
- **Tools & Technologies**: Docker, Swagger, JWT, Casbin
- **Message Brokers**: Kafka, RabbitMQ

Projects

1. **PharmaCosmos – Admin panel for managing farmacies**

   - **Description:** A full-featured pharmacy management system covering all operations — from product imports and inventory tracking to sales analytics and financial reports. Includes a powerful dashboard, product and stock insights, 1C integration, auto-ordering, inventory, transfers, write-offs, and revaluation modules. Integrated with payment systems like Click, Payme, and Alif (Alif integration implemented personally). Contributed major improvements including advanced reports, complex SQL queries, and multiple usability enhancements.

2. **ManageApp.uz - Social Media & Task Management System**

   - **Description:** Built a platform for scheduling social media posts and managing team tasks similar to Jira. Features include post scheduling, team task assignment, and progress tracking.

   - **Web :** profile.manageapp.uz

3. **Findest – Crm for Shop/Service**

   - **Description:** A comprehensive multi-tenant CRM platform built with Go, Fiber, and MongoDB. This platform provides a complete solution for managing tenants, companies, stores, users, and permissions with a robust authentication system.

   - **Web:** findest.uz

Education
Najot Ta'lim – Backend Development (Go,Python,C)
International House – Economics
State University of Economics – Economics (Bank)   **Uzbek**: Native **Russian**: C1 **English**: B2
